

### **Village Green Report for APM 2025**

I will reiterate that the village green is still our greatest asset, although it is our greatest cost.

To keep the green as it looks costs a large amount of money as our last cutter of the green has had to give up and the new contractor has kept it quite neat and tidy.

We have cut the hedge again this spring and raised some of the boughs of the trees on the green so that the new contractor can get his tractor underneath.

Next year I think we may have to weed the green again, much to the annoyance of some people that think we should feed the bees instead.

I still have one seat near the gates to install.

This year we are having a new play area put in as you will find out later and another fete!

Any questions.
